

CENTRAL CONTROL CABINET TYPE: Z-8002

Z-8002 Main Control Cabinet function is to provide power supply for all the production line subcomponents. Control cabinet controls the operation of all machines in the production line, it also protects the electric drives against damages if overloaded. Its panel consists of a set of buttons and switches to control the production line operation and the lamps and indicators informing about its conditions.

The control cabinet is made of a black painted steel. Inside the cabinet, on the DIN rails, there are automatic systems and electric module instrumentation systems (including drive overloads protectors, contactors, etc.) comprising the part of the production line control system. The control cabinet is equipped with a door for an easy access to the inside.

Dimensions and weight:

Width:	up to 3200 mm
Depth:	up to 500 mm
Height:	up to 2100 mm
Weight:	up to 800kg

Supply:

Supply type:	Electric
Supply voltage:	3x400 VAC, 50Hz
Power consumption:	Same as the total power consumption of the entire line
