

MEASURING INSTRUMENTS MOUNTING STATION TYPE: PPMS

PPMS is a dedicated expansion equipment that provides a functionality of a measuring station for any of the aerosol-related parameters. In its standard version it has the ability to mount 2 measuring instruments according to your needs. It is suitable for installing following instruments:

- PPDZ/PPDE - aerosol valve crimp diameter measurement
- PPHZ/PPHE - aerosol valve crimp height measurement
- PPSH - aerosol valve stem's height measurement
- PPHK - aerosol can's contact height measurement
- PPBP - aerosol can bead's planeness measurement

It has an additional pocket for storing all required documents like instruction manual or current calibration certificates which usually comes in handy in quality control stations.

Dimensions and weight

Width	400 mm
Depth:	75 mm
Height:	148 mm
Mass:	4 kg (without measuring instruments)
